Remote · available during US Eastern and UK working hours · open to full-time (direct or via EOR) and contract roles

SUMMARY

Full-stack software engineer with 4+ years of experience building ecommerce web applications for USA, UK and Portugal clients, mainly meal delivery and online shopping. Frontend focus in React.js, TypeScript and Next.js, with backend work in Node.js/Express.js, Python/FastAPI and ASP.NET Core. Primary developer on 5+ production sites, typically building about 90% of each, including cart, checkout, payments and order processing.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Tailwind CSS, HTML5, CSS3, jQuery, Bootstrap
Backend: Node.js, Express.js, REST APIs, Python, FastAPI, C#, ASP.NET Core, ASP.NET MVC
Databases: PostgreSQL, Microsoft SQL Server, MongoDB, Entity Framework
Payments & Integrations: Stripe, Authorize.net, ID.me, Google Maps Places API
Testing & Tools: Jest, Git, GitHub, Docker, AWS, CI/CD

EXPERIENCE

Lead Software Engineer (Contract)
Jul 2026 – Present

FlatFour Ventures · USA (Remote)

- Own delivery of full-stack ecommerce web applications in React.js, TypeScript, Next.js and Node.js, from architecture decisions through release.
- Build backend services and REST APIs, including payment gateway and authentication integrations.
- Work directly with clients and stakeholders to define requirements, scope the work and keep releases on schedule.

Web Developer
Apr 2022 – Jun 2026

ZealousWeb Technologies Pvt. Ltd. · Ahmedabad, India

- Primary developer on 5+ production ecommerce sites for USA, UK and Portugal clients, building about 90% of each: storefront, cart, checkout and order processing.
- Built with React.js, TypeScript, Next.js and Node.js on the frontend, with backend work in Python/FastAPI or ASP.NET Core depending on the client.
- Integrated Stripe and Authorize.net payments and ID.me identity verification into checkout and account flows.
- Built address forms on the Google Maps Places API and reworked the autofill logic to cut down on wrong addresses at checkout.
- Split large form code into reusable components and moved shared state to Redux, so the same pieces could be reused across pages.
- Reduced bundle size and added lazy loading to speed up page loads.
- Worked in Agile sprints with designers and backend engineers to ship responsive, accessible sites.

Trainee
Nov 2021 – Mar 2022

Aark Inosoft · Ahmedabad, India

- Built responsive, cross-browser client websites with HTML5, CSS3, JavaScript and jQuery.
- Supported senior developers on ASP.NET Web Forms and ASP.NET MVC backends in C# and SQL Server, and helped with QA testing and bug fixing.

PROJECTS

MightyMeals
mightymeals.com

- Meal delivery platform for chef-prepared meals (USA). Primary developer: built the React.js frontend, payment gateway integration, checkout flow and order creation.

By Best
bybest.shop

- Fashion and accessories ecommerce store. Primary developer on the frontend: React.js product pages, product filtering and search, and cart and checkout integrated with a Laravel backend.

Fields In Trust
fieldsintrust.org

- UK charity protecting parks, playgrounds and green spaces. Built the ASP.NET MVC website in C# with Entity Framework: content management, web forms and location-based search for protected fields across the UK.
