SUMMARY

Full-stack software engineer with 4+ years building ecommerce web applications for USA, UK and European clients, mainly meal delivery and online retail. Primary developer on 5+ production sites, building about 90% of each: storefront, cart, checkout, payments, subscriptions and order processing. React.js, TypeScript and Next.js on the frontend; Node.js/Express.js, Python/FastAPI and ASP.NET Core on the backend. Use AI coding tools daily and review their output against production requirements.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Tailwind CSS, HTML5, CSS3, jQuery, Bootstrap

Backend: Node.js, Express.js, REST APIs, Python, FastAPI, C#, ASP.NET Core, ASP.NET MVC

Databases: PostgreSQL, Microsoft SQL Server, MongoDB, Entity Framework

Payments & Integrations: Stripe, Authorize.net, WooCommerce REST API, ID.me, Google Maps Places API

Testing & Tools: Jest, AI-assisted development and testing, Git, GitHub, Docker, AWS, CI/CD

EXPERIENCE

Lead Software Engineer (Contract)
Jul 2026 – Present

FlatFour Ventures · USA (Remote)

- Lead engineer for the MightyMeals storefront and API (React.js, Python/FastAPI, WooCommerce): an $18M USD, 27-state meal delivery business rated 4.8/5 on Google from 800+ reviews.
- Own architecture, releases and the payment, subscription and authentication integrations end to end.
- Work directly with the owner and stakeholders to define requirements, scope the work and keep releases on schedule.

Web Developer
Apr 2022 – Jun 2026

ZealousWeb Technologies Pvt. Ltd. · Ahmedabad, India

- Primary developer on 5+ production ecommerce sites for USA, UK and European clients, building about 90% of each (storefront, cart, checkout, order processing) in React.js, TypeScript, Next.js and Node.js with Python/FastAPI or ASP.NET Core backends.
- Delivered Stripe and Authorize.net card payments and ID.me identity verification in checkout and account flows.
- Cut wrong delivery addresses at checkout by rebuilding address forms on the Google Maps Places API with reworked autofill logic.
- Accelerated page loads by 10X and shrank bundle size by 45% through code splitting and lazy loading, and re-architected complex forms into reusable components with centralized Redux state.

Trainee
Nov 2021 – Mar 2022

Aark Inosoft · Ahmedabad, India

- Built responsive client websites with HTML5, CSS3, JavaScript and jQuery, and supported ASP.NET MVC backends in C# and SQL Server.

PROJECTS

MightyMeals — Custom Ecommerce & Meal Delivery Platform
mightymeals.com

React.js · TypeScript · Redux · REST APIs · WooCommerce · Python/FastAPI · PostgreSQL · Stripe · Authorize.net

- $18M USD annual revenue meal delivery business serving 27 states and DC with a 150+ meal menu, rated 4.8/5 on Google from 800+ reviews. Thousands of transactions a week on a headless React.js storefront over WooCommerce via REST APIs.
- **Ownership:** wrote 82% of the storefront's 2,900+ commits over 4.5 years, including 96% of Autoship and 89% of checkout code.
- **Autoship (Order Planner):** built the subscription system for weekly repeat orders charged to saved cards at Monday and Thursday noon ET deadlines, with change, skip, pause and cancel from My Account.
- **Payments:** Authorize.net and Stripe with saved cards, Apple Pay, Google Pay, gift cards and combined coupon and gift card redemption.
- **Growth:** Mighty Points (1 point per $1), $120/$50 referrals, affiliate tracking, Google sign-in and a 15% ID.me-verified military discount.

By Best — Fashion & Accessories Ecommerce Store
bybest.shop

React.js · REST APIs · Laravel

- Storefront for a Tirana, Albania retailer of Swarovski, Swatch and Villeroy & Boch with five physical stores; primary frontend developer.
- Built the React.js catalogue with brand, collection, size and price filters, load-more pagination, wishlist, loyalty points and order tracking.

Fields In Trust — UK Charity Website
fieldsintrust.org

ASP.NET MVC · C# · Entity Framework · Razor Pages

- UK charity, 100 years old, that legally protects 3,007 parks and green spaces: 13,300 hectares and 9.2M people within a 10-minute walk.
- Built in ASP.NET MVC, C# and Entity Framework: 'parks near me' location search, Field Change Request applications for landowners, donations, membership and CMS. Lighthouse desktop: 89 performance, 100 SEO.
