Remote · available during US Eastern and UK working hours · open to full-time (direct or via EOR) and contract roles

SUMMARY

Full-stack software engineer with 4+ years building ecommerce web applications for USA, UK and Portugal clients, mainly meal delivery and online shopping. Primary developer on 5+ production sites, typically building about 90% of each: storefront, cart, checkout, payments, subscriptions and order processing. React.js, TypeScript and Next.js on the frontend; Node.js/Express.js, Python/FastAPI and ASP.NET Core on the backend. Use AI coding tools daily for development and testing, and review their output against real production requirements.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Tailwind CSS, HTML5, CSS3, jQuery, Bootstrap
Backend: Node.js, Express.js, REST APIs, Python, FastAPI, C#, ASP.NET Core, ASP.NET MVC
Databases: PostgreSQL, Microsoft SQL Server, MongoDB, Entity Framework
Payments & Integrations: Stripe, Authorize.net, WooCommerce REST API, ID.me, Google Maps Places API
Testing & Tools: Jest, AI-assisted development and testing, Git, GitHub, Docker, AWS, CI/CD

EXPERIENCE

Lead Software Engineer (Contract)
Jul 2026 – Present

FlatFour Ventures · USA (Remote)

- Lead developer on full-stack ecommerce web apps in React.js, TypeScript, Next.js and Node.js, from architecture through release.
- Build backend services and REST APIs, including payment gateway and authentication integrations.
- Work directly with clients and stakeholders to define requirements, scope the work and keep releases on schedule.

Web Developer
Apr 2022 – Jun 2026

ZealousWeb Technologies Pvt. Ltd. · Ahmedabad, India

- Primary developer on 5+ production ecommerce sites for USA, UK and Portugal clients, building about 90% of each (storefront, cart, checkout, order processing) in React.js, TypeScript, Next.js and Node.js with Python/FastAPI or ASP.NET Core backends.
- Integrated Stripe and Authorize.net payments and ID.me identity verification into checkout and account flows.
- Built address forms on the Google Maps Places API and reworked the autofill logic to cut down on wrong addresses at checkout.
- Split large forms into reusable components with shared state in Redux; cut bundle size and added lazy loading for faster page loads.
- Worked in Agile sprints with designers and backend engineers to ship responsive, accessible sites.

Trainee
Nov 2021 – Mar 2022

Aark Inosoft · Ahmedabad, India

- Built responsive, cross-browser client websites with HTML5, CSS3, JavaScript and jQuery, and supported senior developers on ASP.NET Web Forms and ASP.NET MVC backends in C# and SQL Server, including QA testing and bug fixing.

PROJECTS

MightyMeals — Custom Ecommerce & Meal Delivery Platform
mightymeals.com

React.js · JavaScript · REST APIs · WooCommerce · Python/FastAPI · Stripe · Authorize.net

- High-traffic ecommerce platform for an $18M USD annual revenue meal delivery business, processing thousands of transactions a week. Headless React.js frontend on a WooCommerce backend via REST APIs, with custom ordering workflows and secure payment processing.
- **Frontend architecture:** built and maintain the custom React.js ecommerce app with reusable components and dynamic product browsing.
- **Checkout and payments:** integrated Authorize.net and Stripe; built custom checkout for complex payment and order-processing rules.
- **Autoship subscriptions:** led development and maintenance of the custom recurring-delivery system, covering subscription management, recurring order generation, payment processing, delivery scheduling and customer accounts.
- **Order management:** built custom order creation workflows linking the frontend to backend APIs for customer, product and payment data.
- **Performance and UX:** frontend and performance work for a high-volume store, improving product discovery, cart and checkout usability.

By Best — Fashion & Accessories Ecommerce Store
bybest.shop

React.js · REST APIs · Laravel

- Primary developer on the frontend, building the React.js product catalogue, product pages, filtering and search.
- Built the cart and checkout flow and integrated it with the Laravel backend through REST APIs.

Fields In Trust — UK Charity Website
fieldsintrust.org

ASP.NET MVC · C# · Entity Framework · Razor Pages

- Built the ASP.NET MVC website in C# with Entity Framework: content management for the charity's staff, web forms and location-based search of protected fields across the UK.
